Chapter 1. How to Decorate Your Sim Lots Using Cheat Commands on a PC or Mac

By utilizing cheats, your Sims' homes and hangouts will look more realistic.

This section of the guide will teach you how to place objects anywhere by overriding the snap-to-grid feature.

Chapter 2. Enable Cheat Mode

To utilize cheat codes, you must enable cheat mode.

1. Select the lot you want to build.
2. Open the command bar by pressing **Ctrl+Shift+C** on a PC or **Cmd+Shift+C** on a Mac.
3. In the command bar, type **testingcheats on**, then press enter.

Chapter 3. Build/Buy Mode Cheats

Table 1. The Sims 4 Buy/Build Mode Cheats

Cheat Code	Result
bb.moveobjects	Overrides the snap-to-grid feature
bb.ignoregameplayunlocksentitlement	Unlocks all career reward objects (including styled rooms)
Click roof and use Shift + C	Adds extra nodes to create curves in roofs
bb.showhiddenobjects	Reveals objects that cannot be purchased from the catalog
bb.showliveeditobjects	Unlocks over 1000 extra world environment objects (you must activate the bb.showhiddenobjects cheat first)
bb.enablefreebuild	Enables build/buy mode in lots where build/buy mode is disabled: The hospital, police station, and science lab in the <u>Get To Work</u> expansion, and the magic headquarter in <u>Realm of Magic</u> expansion. This cheat will also work on secret lots.

Chapter 4. Placing Objects

1. In the command bar, type **bb.moveobjects** to enable the move objects cheat.
2. Select build/buy mode.
3. Select an object, and place it in the preferred location.

TIP: Panning out will allow for more accurate placement of objects.

- To move the object up, press the **9** key.
- To move the object down, press the **0** key.
- To move the object in any direction, click and drag the object while holding down the **ALT** key.

Chapter 5. Resizing Objects

With the object selected, press the  key to enlarge and the  key to shrink an object.

Chapter 6. Disabling Cheat Mode

1. To disable the move objects cheat, type **bb.moveobjects** in the command bar.
2. To disable cheats, type **testingcheats off**.
3. To close the command bar, click inside the command bar, and press the **Esc** key.
